EDUCATION

University of Toronto

Toronto, ON

Bachelor of Applied Science, Computer Engineering + PEY Co-op

Sept. 2024 – May 2028

- Relevant Courses: Linear Algebra, Calculus I and II, Computer Fundamentals, Dynamics, Digital Systems, Programming Fundamentals, Software Design and Communication

EXPERIENCE

Software Engineer Intern

May 2025 – Aug. 2025

TD Bank

Toronto, ON

- Spearheaded the engineering of an internal-to-external asset mapping pipeline, accurately connecting 98% of 20,000+ asset pairings
- Programmed scalable Python scripts that scan 100,000+ middleware assets for CID policy and security compliance, reducing manual analysis time by 70%.
- Deployed IP web crawler that identifies 99% of 5,000+ previously unknown assets, enabling seamless ingestion into ServiceNow for audit logging.

PROJECTS

Stocker - Stock Trading Simulator | *React, Node.js, Firebase*

Jun. 2025 – Aug. 2025

- Constructed a full-stack stock trading simulator that enables virtual portfolio management and trade execution
- Implemented data caching with in-memory structures to reduce redundant API calls and optimize performance
- Integrated a leaderboard system that ranks users by portfolio value using cloud functions and database triggers

Spooky Spikes - 3D Obstacle Avoidance AI | *Python, Tensorflow, Keras*

May 2025 – Jun. 2025

- Trained a DQN agent to play a reflex-based game by learning to jump and duck over obstacles with 99% accuracy
- Optimized reward shaping, experience replay, and epsilon-greedy exploration for 100% training success
- Programmed 3D environment rendering pipeline and dashboard to visualize AI decisions, q-values, and confidence

ModelShift - AI Response Comparison Tool | *React, Node.js, Crypto*

Dec. 2024 – Mar. 2025

- Devised a React/Node.js app for prompting multiple AI models simultaneously with encrypted API key storage
- Architected AES-256 encryption, layered rate limiting, and automated abuse detection to safeguard APIs
- Designed a responsive UI with exportable results, usage analytics, customizable chat options, and AI selection.

Deadknight - Java RPG Game Engine | *Java Swing, Java AWT, JavaIO*

Apr. 2024 – May 2024

- Engineered a 2D Roguelike game in Java with 60 FPS, multithreaded rendering, real-time input, and animation
- Developed a sophisticated physics engine featuring convex hull collision detection using Separating Axis Theorem, binary search velocity resolution, and KD-Tree spatial partitioning for entity interactions
- Built a level design pipeline with a visual level editor, procedural level generation, and dynamic content loading

AWARDS & CERTIFICATIONS

AWS Certified Cloud Practitioner | *Amazon Web Services*

2025

- Acquired foundational AWS cloud services and architecture knowledge.

Governor General Academic Medal | *Thornhill Secondary School*

2024

- Awarded to the student who achieves the highest grade average upon graduation from a secondary school

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, SQL, TypeScript, Go, Ruby, HTML/CSS, Kotlin

Developer Tools: Git, Docker, Kubernetes, Ansible, Postman, Firebase, AWS, Azure, GraphQL, Redis, MySQL, PostgreSQL, MongoDB, Linux, Unix, Arduino, MATLAB, Jira, ServiceNow

Frameworks & Libraries: NumPy, Pandas, TensorFlow, PyTorch, FastAPI, Flask, Django, React, Angular, Node.js, Spring Boot, JavaFX, Java Swing, Pygame, Selenium, Flair
